**Abstract:** Manipulation statements dating back to the dawn of mankind, when Satan deceived into temptation of Adam and Eve distorting the word of God. In a democratic system, the mass media like newspapers, radio, TV or the Internet, play an increasingly important role in shaping the beliefs and attitudes and promoting various ideologies which are contrary to the teaching of the Catholic Church.

The article presents the methods of manipulation statements of Pope Francis on selected examples, comparing the official and complete statements of the Pope with the information, published about them in the Polish media, liberal-left-wing.
