

HOW TO USE ELECTRONIC RESOURCES AVAILABLE AT THE UNIVERSITY LIBRARY OF THE JOHN PAUL II CATHOLIC UNIVERSITY OF LUBLIN?

You can use electronic full-text,
bibliographic or abstract resources
(databases) purchased by the John Paul II
Catholic University of Lublin for a given year
without logging in to the network of the
John Paul II Catholic University of Lublin, i.e.
on computers located in the buildings of
the John Paul II Catholic University of Lublin
(also via wi-fi)

Employees and students of the John Paul II
Catholic University of Lublin also have the
opportunity to remotely use these
resources outside the network of the John
Paul II Catholic University of Lublin, on any
device with Internet access. The condition is
to own an active library account.

MEDLINE Complete

A collection of articles in the field of medicine, nursing, stomatology, the health care system, and preclinical sciences (including psychology).

The index uses subject indexing according to the MeSH (Medical Subject Headings) thesaurus

The full-text Medline database is connected to the MEDLINE (abstract) database

EBSCO databases

Medicine, Health sciences

CINAHL Complete

A collection of journal materials in the field of nursing and medical care. The database includes over 1300 indexed periodical titles – it is a full-text database

AHFS Consumer Medication Information

Information for patients i.a.
medicines in English and
Spanish – database published
by the American Society of
Health – System Pharmacists.
It informs about over 4700
medicines

Health Source – Consumer Edition

Collection of information in the field of public health (medical sciences, food and nutrition sciences, child care, sport medicine) – full-text database

Health Source – Nursing/Academic Edition

A collection of approx. 550 titles of scientific journals in the field of health sciences – full-text database

APA PsycArticles

Full-text peer-reviewed scientific articles in the field of psychology – more than 153 thousands articles from over 80 journals published by the American Psychological Association (APA) and the Educational Publishing Foundation (EPF) and other organisations

APA PsycTest

The database prepared by the American Psychological Association (APA) used as a repository for psychological tests and other research instruments for psychologists and specialists in related fields

(psychiatry, management, business, education, social sciences, neurology, law, medical sciences, sociology)

EBSCO Databases Psychology, psychiatry

APA PsycInfo

Abstracts of articles from scientific journals, book chapters, books and other scientific works. It is the largest collection of peer-reviewed texts in the field of behavioural science and mental health – over 3 million records and summaries (chronological scope reaches back to the 17th century)

APA PsycTherapy

Recordings from psychotherapeutic sessions

ATLA Religion Database with ATLA Serials PLUS

ATLA Religion Database with ATLA Serials
PLUS is the leading database dedicated to
religious and theological and related
sciences created by the American
Theological Library Association. It
includes a wide range of resources,
including journals, monographs, essays
and conference materials, offering fulltext access to many publications.

EBSCO DatabasesTheology, philosophy

Philosopher's Index

An up-to-date and comprehensive bibliographical database prepared by the Philosopher's Information Center. It includes scientific research in all major fields of philosophy. It contains authorial abstracts of scientific research published in journals and books, including publications included in anthologies and book reviews. *The Philosopher's Index* contains research published since the beginning of 1940 and includes over 680 journals from more than 50 countries in many languages

Bazy EBSCO Human and social sciences Law

Business Source Ultimate

Business Source Ultimate is a complex database offering access to literature in the fields of business, economics and management. It includes full-text articles from scientific journals, market reports, vocational analyses and case studies from all over the world.
7800 journals.

Humanities Source Ultimate

Database containing a wide range of human sciences, including literature, art and science. It includes full-text journals, columns, interviews, reviews and original literary works. It is a valuable source of information for scientists and didacticians from different fields of the human sciences.

Sociology Source Ultimate

Sociology Source Ultimate is a comprehensive database focusing on sociological topics and related social sciences fields. It offers access to full-text articles from scientific journals, books, research reports, and conference materials from all over the world.

LegalSource

It contains the full text of the most popular scientific journals in the field of law, and it is an important source of information on current problems and research in the field of lawmaking.

ERIC

(Education Resource Information Center)

Abstracts and developments of articles from over 2200 journals connected with education and teaching.

Nursing students' metaphorical perceptions of professional communication and the concept of nursing in their first clinical practice: qualitative research

Ayşegül nikiz idgen İland Sinem Sönmez İ

Abstract

Background Nursing education combines the ontical knowledge and clinical practice to prepare nursing students to meet the evolving demands at healthcare services. Understanding nursing students' metaphorical perceptions of the nursing professional deposits and communication during their lits clinical expectation can provide valuable insights into their professional identity and communication wills, as well as giving information about necessary improvements in nursing could for. This study since to rewall the metaphorical demorphisms of nursing students regarding the concept of professional communication and nursing during their list clinical practices.

Methods: The study was conducted using a phonomenological design, a qualitative research method. A student information form and atmetapaor form developed by the researchers, were used as data collection tools. Participants sociofernographic data were analysted on the Standard Package for Social Sciences (HPSS). The analysis and evaluation of the metaphors used by nursing students for the concepts of nursing and professional demonstration were carried out in five stages by following the characteristics cuttined in the qualitative data analysis approach called Metaphor Analysis. The Consolidated Citiena for Reporting Qualitative Research (CRH-Q) encokist was followed in the study.

Results: AIR35 participants in the study were line year naring students, with 81.0% being female and the evenage age being 19.68 ± 0.92 years. Of the participants, 66.7% had shown the nursing department willingly, and 57.1% had preferred the rurang profession, which were categorized in a four groups, and 32 metaphors related to professional communication, which were categorized in a four groups, and 32 metaphors related to professional communication, which were categorized into assigning.

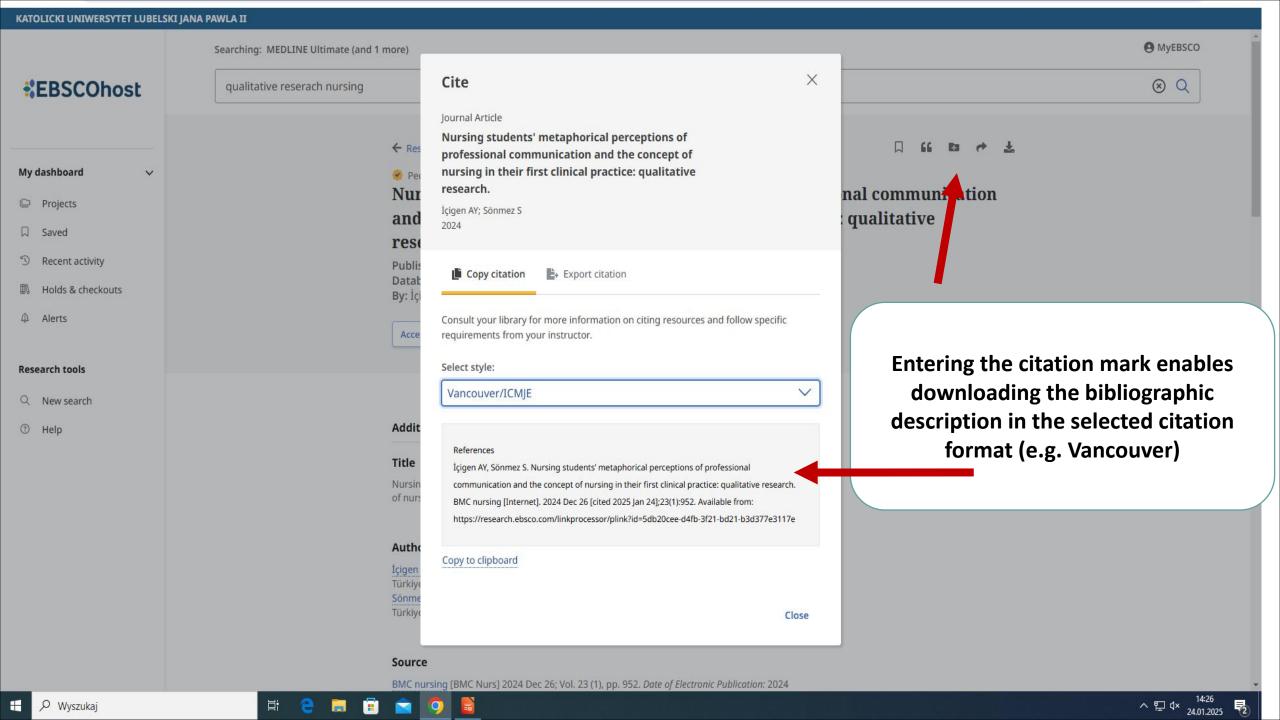

Conclusion The mataphoneal perceptions of numing students during their first clinical practices provided professional insights into how they executed communication and the numing profession. These metaphonean of great importance in understanding the challenges, the skills gained, and the emotional responses and uncorded during the students professional development processes.

Metaforyczne postrzeganie przez studentów pielęgniarstwa komunikacji zawodowej i koncepcji pielęgniarstwa w ich pierwszej praktyce klinicznej: badania jakościowe.

Published in: BMC Nursing, 12/26/2024, CINAHL Ultimate

By: Yıldız İçigen, Ayşegül; Sönmez, Sinem

Wstęp: Edukacja pielęgniarska łączy wiedzę teoretyczną i praktykę kliniczną, aby przygotować studentów pielęgniarstwa do sprostania zmieniającym się wymaganiom świadczeń zdrowotnych. Zrozumienie metaforycznego postrzegania zawodu pielęgniarki przez studentów pielęgniarstwa i komunikacji zawodowej podczas ich pierwszych doświadczeń klinicznych może dostarczyć cennych informacji na temat ich tożsamości

EBSCOhost – Al Insights

EBSCOhost AI Insights is a tool based on the artificial intelligence, which generates concise summaries of full texts available in selected EBSCO databases (including medical ones, such as CINAHL Ultimate subscribed by the John Paul II Catholic University of Lublin).

The tool helps to quickly evaluate the usefulness of scientific articles for conducted research, without having to read the full text. What is more, summaries are also generated in Polish, even in the case of English-language articles.

Przyszłość żywienia. Jak nauka i technologia kształtują wybory żywieniowe?

After clicking on Generate Al Insights" we will receive the summary of the article

Insights

- Highly processed foods are linked to increased calorie intake, weight gain, and chronic diseases like obesity, type 2 diabetes, cardiovascular diseases, and cancer. Reducing consumption of ultra-processed foods may be an effective strategy for obesity prevention and management.
- · Environmental concerns and climate change are driving recommendations to increase plant-based food consumption and reduce meat intake, leading to the concept of a "planetary diet" that emphasizes plant-based foods while limiting animal-based foods, especially highly processed meats.
- · Gastrophysics, the study of how sensory and environmental factors influence food experiences, can provide insights into shaping dietary preferences and promoting healthier food choices, such as increasing consumption of leafy green vegetables.
- · Nutrigenomics and nutrigenetics, which study the interactions between genes and diet, have the potential to enable personalized dietary recommendations based on an individual's genetic makeup, taking into account factors like taste perception and metabolism.
- Emerging technologies like artificial intelligence (AI) and language models like OpenAI's ChatGPT have the potential to provide dietary recommendations and generate meal plans, but they cannot fully replace the personalized approach and psychological support offered by human dietitians.

Disclaimer: These insights are generated by AI based on the content of the source document. Information quality may vary and AI Insights should be validated for accuracy. Insights are newly generated with each request and are not reproducible.
